Missouri Office of Information Technology

Missouri .GOV Standard	Document Number: ITGS0002
	Effective Date:
	11/20/2002
	Published By:
	Office of Information
	Technology

1.0 Purpose

This is intended to advise agencies on the new Missouri.GOV standard. An explanation of domain name and domain levels as well as implementation timeframes and implementation instructions are included.

2.0 Scope

The scope of the Missouri.GOV standard includes all executive departments, elected officials, judicial branch, legislative branch and boards and commissions.

3.0 Background

Once reserved for use by federal departments and programs, the .gov domain was expanded in 2002 to include state, county and city government as well as Native Sovereign Nations. Missouri has traditionally used the state.mo.us URL. In spring of 2003 the .us domain was made available to any public entity. The .gov URL will be available only to governmental entities, thus providing a level of confidence to the public of the validity and association with government. Through discussions with the Governor's Office and observance of a general trend by other state governments to move to the .gov URL, a decision was made in November 2002 to migrate the state's portal and department websites to mo.gov.

Office of Information Technology

Missouri.GOV Standard

Domain Levels Explained

A domain name is all the text that follows the first period '.' in a host name. A host name is used to locate an entity on the Internet. A host name is part of a Uniform Resource Locator (URL), which is the address of a site or document on the Internet.

First-Level Domain

This would be the ".gov" established by the federal government.

Second-Level Domain

missouri.gov – primary domain

mo.gov – alias domain

Both "**missouri.gov**" and "**mo.gov**" are registered through the Government Domain Registration Services to the Missouri Office of Information Technology (OIT).

Third-Level Domain

This level will be appropriate for identifying the departments within Missouri State Government. The identification should consist of the department's accepted abbreviation format.

Example: "dnr.missouri.gov"

Approval process: Department CIO to submit request to OIT in letter or e-mail format.

Fourth-Level Domain

This level will be used at the discretion of the departments for their department-sponsored programs.

Example: "mostars.dhe.missouri.gov"

Approval process: To be determined by each department for their internal use.

Implementation Timeframe

The Missouri State Home Page (<u>www.state.mo.us</u>) will change to <u>www.missouri.gov</u> prior to December 31, 2002. Dual URLs will be maintained until December 31, 2003. (Revised 12/4/02: <u>www.state.mo.us</u> URL will be kept indefinitely.)

Department requests for third level domain to be submitted to OIT by December 31, 2002.

Department migrations to the new URL to be completed by December 31, 2003.

Implementation Instructions for .GOV URL Standard

.GOV Standard Overview

Both "missouri.gov" and "mo.gov" are registered through the Government Domain Registration Services to the Missouri Office of Information Technology (OIT). This is considered the second level domain.

The third level domain will be appropriate for identifying the departments within Missouri State Government. The departments have notified OIT of their selected primary and alias .gov URLs. **This list of .gov URLs is posted on the OIT and**

DMD websites. Any further requests for additional third level domain .gov URLs can be made via e-mail to OIT for CIO approval.

The fourth level domain will be used at the discretion of the departments for their divisions and department-sponsored programs. Policies and approval processes are to be determined by each department for their internal use.

Existing .com and .org URLs currently used by the departments are to be considered "grandfathered in". Whenever possible, it is recommended that such URLs be migrated to the .gov standard. If a department is considering adding additional .com and/or .org URLs, the request will need to be submitted to OIT for CIO approval accompanied by a business case for deviating from the .gov standard.

Implementation Timeframe

The Missouri State Home Page (www.state.mo.us) now reflects the change to www.missouri.gov as the primary and www.mo.gov as the alias URL. The dual URL of www.state.mo.us will be kept indefinitely.

Department migrations to the new .gov URL are to be completed by December 31, 2003. Each department will need to determine how long to run dual URLs with their existing "state.mo.us" URLs.

Implementation Procedure

To begin implementing your department's change to the "missouri.gov" and "mo.gov" domain, please send your requests for domain name system entries to Office of Administration, Technology Services section. This can be done by submitting a request via the Technology Services cSupport ticket tracking system, sending an e-mail request to helpdesk@mail.state.mo.us or calling the help desk at 751-2201.

URL changes will have far-reaching effects on everyone who accesses your Web site, whether via a bookmark or as a click-through from another site, such as the State Home Portal.

Whenever possible, you should communicate changes to your URL and offer redirect pages to the people you know have links to your pages. One handy way to tell other state agencies about specific third- and fourth-level domain changes is through the "MO-WEB" discussion list. Subscribers to this list represent the membership of the Digital Media Developers Group (DMD), a subcommittee of the ITAB. These developers are the Web maintainers, Web masters, and technical gurus who collaborate and discuss matters of common interest.

Are your agency's Web developers members of the DMD? The DMD meets monthly to share information, view presentations, and help each other on Web

issues. For more information about the group and how to sign up for the MO-
WEB discussion list, please visit the DMD Web site at:

http://www.oa.state.mo.us/dmd/
